

Oasis Sykes Pumps

General duties

Oasis Sykes 3H Jetting pump is an exhaust priming pump adapted with 3"/2½" inlet / outlet quick-release fittings

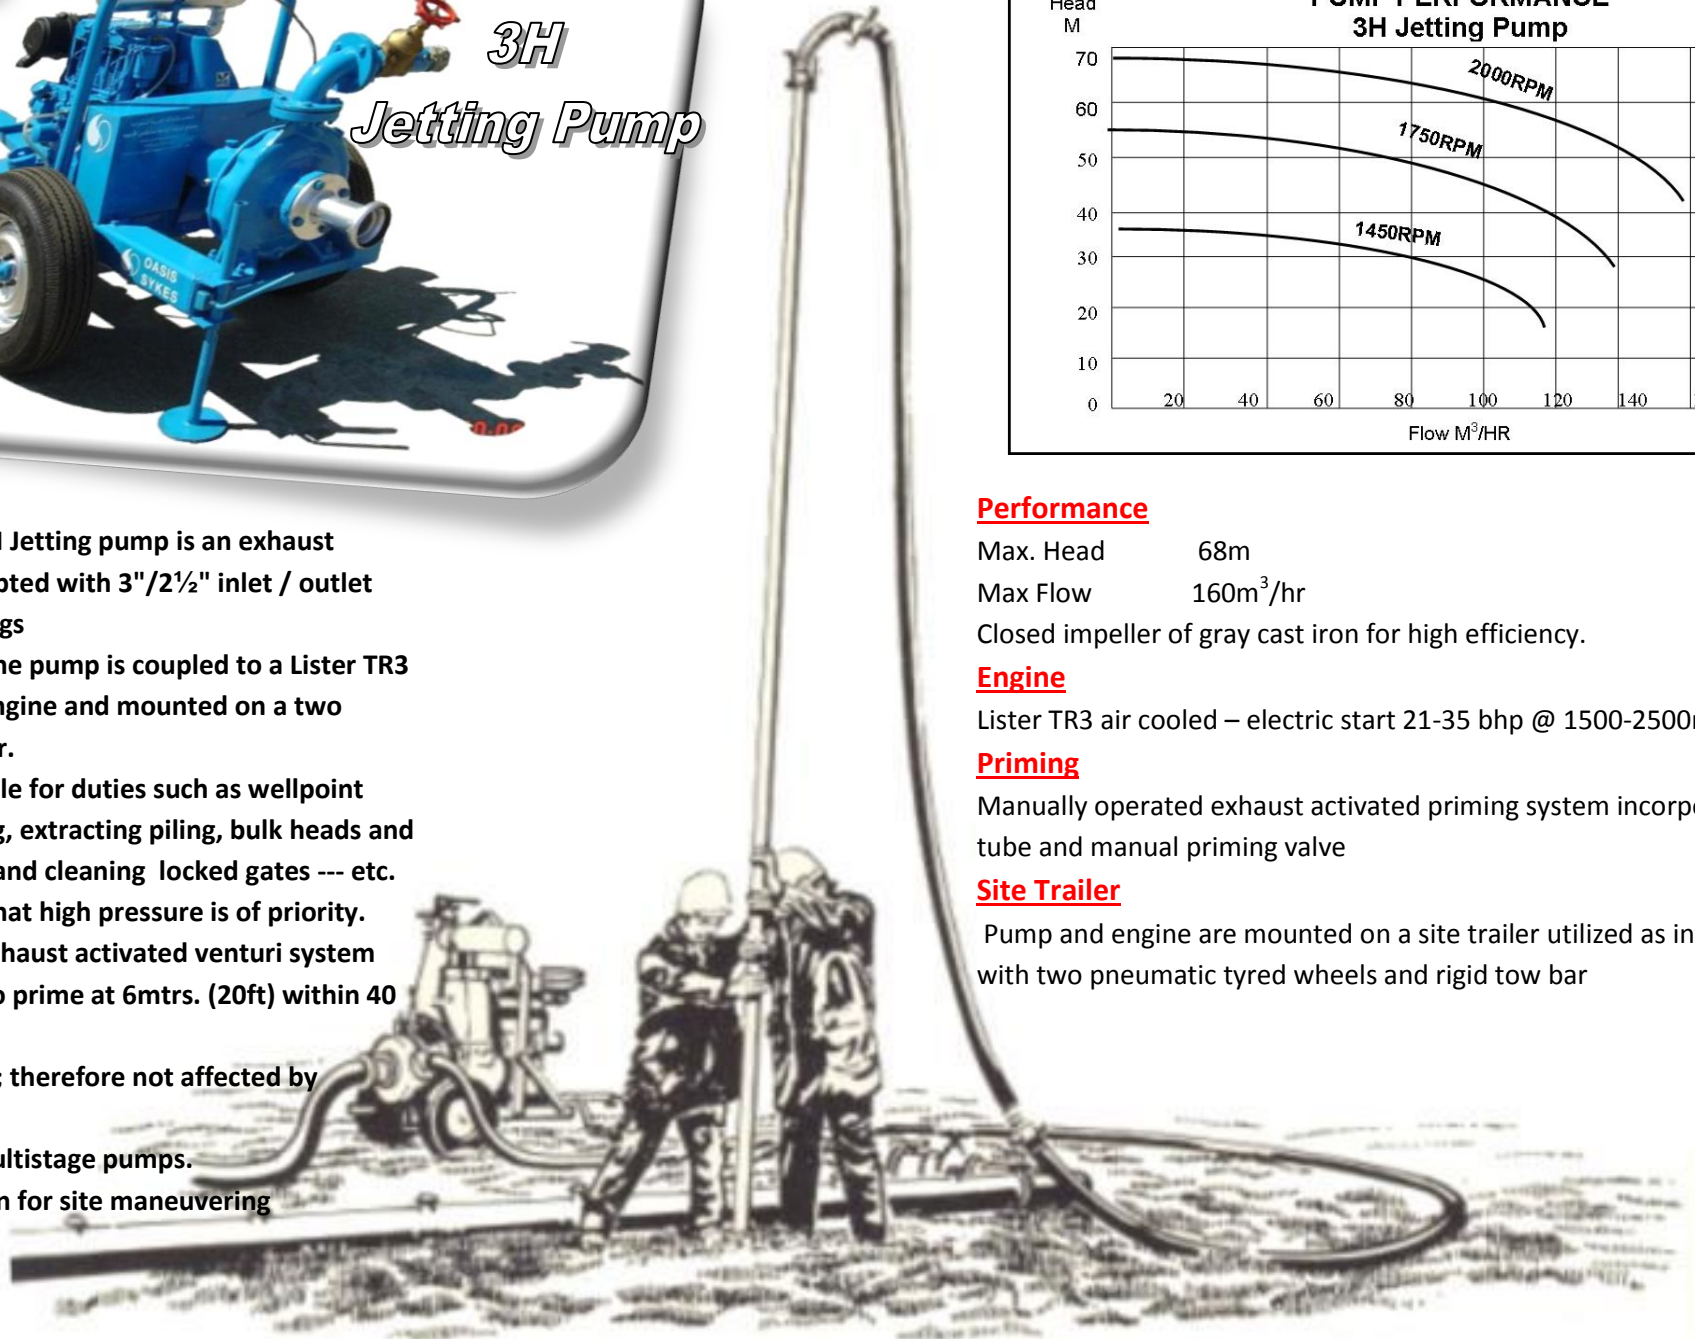

In standard form the pump is coupled to a Lister TR3 air cooled diesel engine and mounted on a two wheeled site trailer.

The pump is suitable for duties such as wellpoint jetting, fire fighting, extracting piling, bulk heads and sheeting, flushing and cleaning locked gates --- etc.

In fact anywhere that high pressure is of priority. By the use of an exhaust activated venturi system the pump is able to prime at 6mtrs. (20ft) within 40 seconds.

Single stage-pump; therefore not affected by problems associated with multistage pumps.

Mobile, light design for site maneuvering

Performance

Max. Head 68m

Max Flow 160m³/hr

Closed impeller of gray cast iron for high efficiency.

Engine

Lister TR3 air cooled – electric start 21-35 bhp @ 1500-2500rpm

Priming

Manually operated exhaust activated priming system incorporated a venturi tube and manual priming valve

Site Trailer

Pump and engine are mounted on a site trailer utilized as integral fuel tank with two pneumatic tyred wheels and rigid tow bar
